

# Standard Tree Guard Sizing Worksheet

Tree Bed Name: \_\_\_\_\_

<b>WIDTH LEFT</b> <i>from step #2</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches	<b>WIDTH RIGHT</b> <i>from step #4</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches	<b>LENGTH STREET</b> <i>from step #5</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches	<b>LENGTH SIDEWALK</b> <i>from step #6</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches
<b>SHORTEST WIDTH</b> <i>in inches of these two numbers</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches		<b>SHORTEST LENGTH</b> <i>in inches of these two numbers</i> <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/> inches	
DIVIDE BY 12 <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>		DIVIDE BY 12 <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>	
*ROUND DOWN TO NEAREST HALF FOOT <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>		*ROUND DOWN TO NEAREST HALF FOOT <input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>	
<b>GUARD WIDTH</b>		<b>GUARD LENGTH</b>	
<input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>		<input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>	
<b>GUARD WIDTH</b>		×	<b>GUARD LENGTH</b>
<input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>		<input style="width: 100%; height: 30px; border: 1px solid black;" type="text"/>	

**ORDER THIS SIZE TREE GUARD**

**Even if your tree bed is 8.0' wide consider ordering a 7.5' Tree Guard. Not only is it less expensive, you minimize potential damage and maximize anchoring options if you encounter unforeseen unground obstacles.**

\*Reminder: Curb Allure Tree Guards come in 6 inch increments between 1.0 and 10.0 feet (ex. 1.0, 1.5, 2.0, et al.) Use the worksheet above to figure out the best size Tree Guard to order for your bed/pit/well. For example: If your SHORTEST WIDTH = 34 inches then you would divide by 12 and get 2.833 feet, which means you would round down and your GUARD WIDTH would be 2.5 feet. Similarly if your SHORTEST LENGTH = 99 inches then you would divide by 12 and get 8.25 feet, which means you would round down and your GUARD LENGTH would be 8.0 feet. Therefore you would order a 2.5 × 8.0 foot Tree Guard.

**★ ★ ★ Guards MUST be recessed at least 18 inches from the street. ★ ★ ★**
